

UMAR ALIY

FULL-STACK DEVELOPER

ABOUT

I am a Full-Stack Developer with nearly four years of experience, currently based in Seoul, South Korea. I specialize in building interactive and scalable web applications, with experience across frontend, backend, and deployment workflows. I enjoy collaborative environments, continuous learning, and taking on new technical challenges. Outside of engineering, I enjoy sports, chess, traveling, and exploring different cultures. I value creativity, clarity, and purposeful problem solving.

- 010-5889-0660
- umaraliy092@gmail.com
- 서울 서대문구 가재울로12길

EDUCATION

- 2018- 2023
- Dongseo University
- Bachelor's Degree

LANGUAGES

- English (Fluent)
- Korean (Intermediate)
- Russian (Fluent)

VISA

- E-7

SKILLS

- Frontend: React, Next.js, TypeScript, Redux, RTK Query, MUI, Tailwind, Axios
- Backend: Node.js, NestJS, Express, GraphQL, REST, MongoDB, PostgreSQL
- DevOps/Infra: Docker, PM2, NGINX, Linux, AWS, CI/CD
- Tools: Git, Yarn, Turborepo, Postman, Figma

WORK EXPERIENCE

JCG inc. 13/10/2025 - Present
FullStack Developer & DevOps

- Built and maintain a full-stack analytics platform deployed on Cloudflare and Naver Cloud Platform (NCP), featuring multiple interactive dashboards and reporting views with charts, bar graphs, and data visualization components using Recharts and Chart.js.
- Implemented automated daily MySQL backups to object storage, ensuring production-grade data durability and disaster recovery for critical client data.
- Designed and implemented ClickHouse-based pre-aggregation pipelines with rolling 3-day computation windows to optimize OLAP query performance and reduce expensive runtime calculations.
- Developed and maintained multiple analytics dashboards used for performance monitoring across diverse data sources, supporting complex filtering, aggregation, and visualization workflows.
- Built export pipeline for analytics data, supporting Excel download of aggregated datasets and PDF export of dashboards (charts, tables, bar graphs), enabling offline reporting and stakeholder distribution.

ITC Global 12/2023- 06/2025
FullStack Developer & DevOps

- Managed a Monorepo projects for GraphQL & Rest API Servers, Batch and Crawling Servers
- Integrated NodeJs TypeScript and NestJs GraphQL for efficient data fetching and flexible API
- Deployed with Docker Containers using Docker-compose, PM2, ShellJS and NGINX
- Implemented popular Patters such as MVC Middleware DI Decorators & caching architectures
- Utilized NEXTJS, including Next-AppRouter and Next-PagesRouter
- API integrations Axios, Fetch, Apollo Client and handling state management via React-Query
- Implemented Real time applications using WebSocket, SocketIO and Subscriptions via TCP
- Monitor PM2 plus and Grafana for Docker Containers

Garden Plast Company 04/2022- 12/2023
Frontend Developer

- Developed SPA applications using React, TypeScript, Redux, and MUI
- Built Node.js/Express backend APIs with MongoDB integration
- Created reusable UI systems and responsive interfaces
- Managed multilingual support with react-i18next
- Collaborated with designers using Figma workflows
